

## **GO 2.4 Series Cordless Optical Air Mouse**

*On the Desk, In the Air . . . Anywhere!*

### **Comfort, Freedom and Flexibility**

You can have it all with the GO 2.4 GHz Wireless Optical Mouse! Sit back and enjoy wireless freedom. This multipurpose mouse offers the ultimate in flexibility – the optical sensor allows you to use it on your desktop; the gyroscopic technology allows you to use it in the air. What a perfect combination for everyday computing, presentations, gaming, surfing the net and more!

### **Customization and Control**

GyroTools™ Media Controls Software for Windows® (included) provides over 50 dynamic Internet, Media, Input, Windows and General tools for fingertip controls, easy access and customization to your liking. Imagine with the flick of the wrist or push of a button you can launch an MP3 playlist, surf forward and backward, or adjust your sound volume.

### **Range and Mobility**

The Gyraton GO 2.4 GHz Mouse frees you from the confines of your desk and allows you to be mobile up to 30' away from your computer with no line-of-sight limitations. Gyraton's high-power 2.4GHz radio transmits data at lightening fast speeds. You'll feel the benefits of a smoother tracking, real-time cursor movement and quick responses.
